

Welcome 🎉

About

Fifth meeting - welcome back!

Website: <http://railsclub.me>

Facebook group: <http://fb.railsclub.me>

Next meeting (April 22)

Guest speaker!

Tute Costa from Thoughtbot

Today's Meeting Procedure

- We are beginning our applications!

Come up with something you want
to build. 🧠

Come up with something you want to build.

Can be a blog, portfolio website, Pinterest clone, whatever you want.

The goal is to have this project built using skills you learn here.

Okay. Here we go!

Log onto Google Docs

(your school account)

Create a new document:

Name it: Rails APP_NAME

Example: Rails Joe

Share it with: 18mossj@millburn.org
(my school email)

Change the page layout to landscape

(File —> Page Setup —> Landscape)

Create a table with 3 columns and 3 rows.

This is the planning document for
your applications!

Column 1: Name of model!

Column 2: Model stuff

Column 3: Data attributes

Figure out what your application needs!

Determine what models (data objects) your application needs to run!

Reminder: a model is a user, a book, a movie, any **object** you are manipulating!

Before you begin coding,
I must approve your plan!

Go!

Before we go

- Make sure you join our Facebook group: <http://fb.railsclub.me>
- Next meeting is next week (after break)! :)
- Message me on FB or email me if you have any questions
- Feel free to read up about Rails or learn skills in your freetime

See you soon! 🖐️
